YakShaver

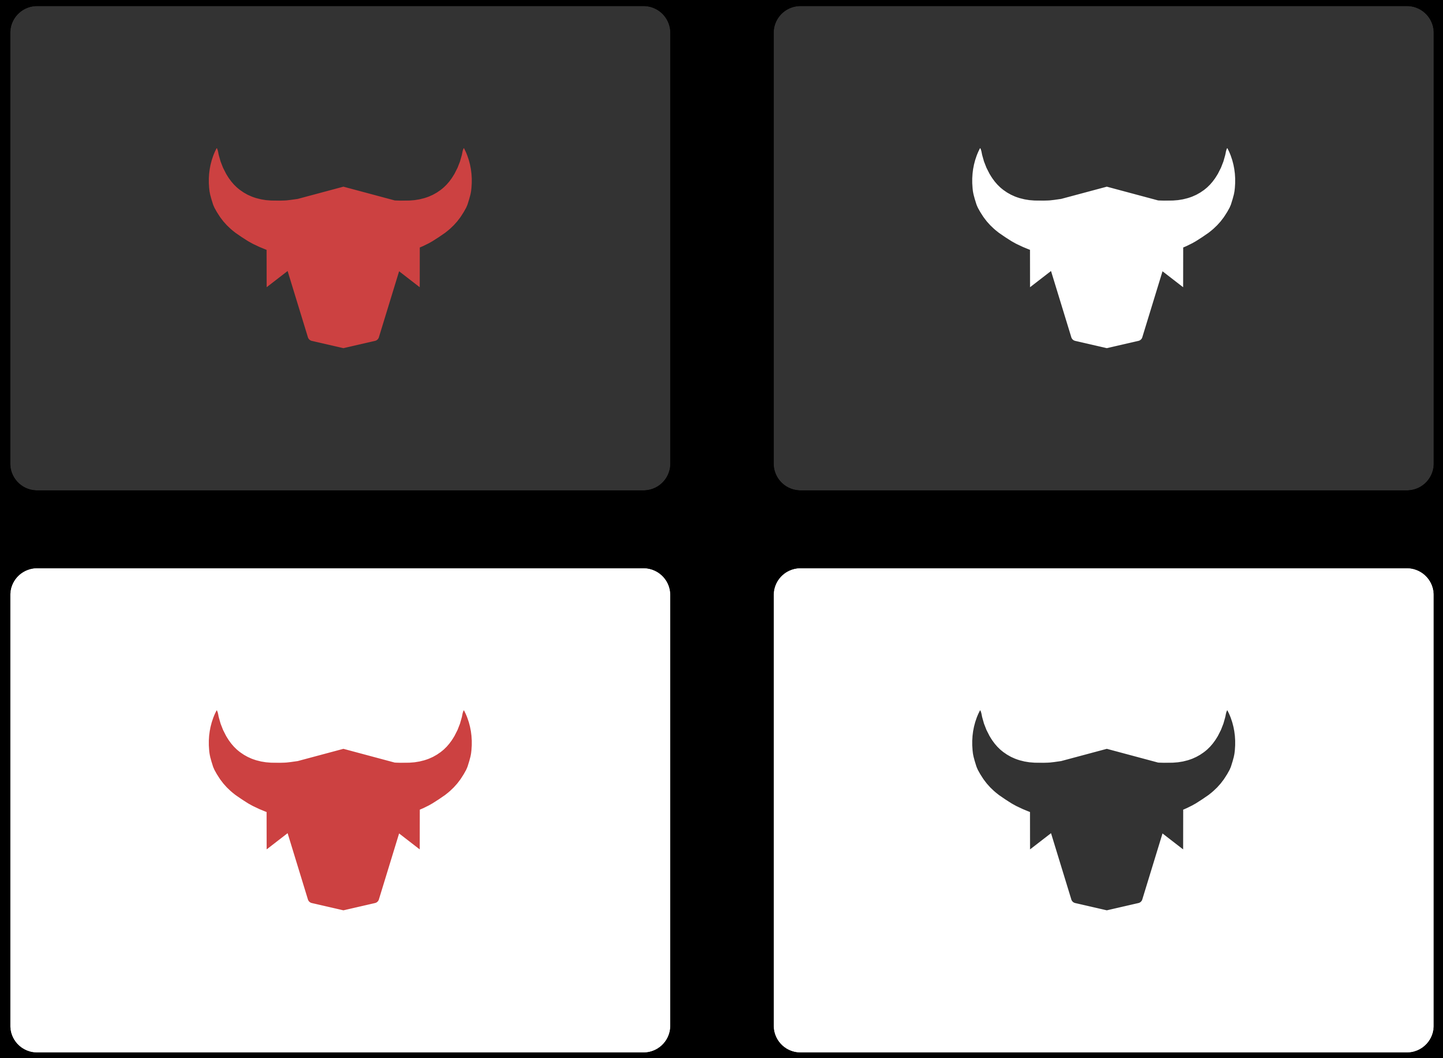
YakShaver Logo - Full

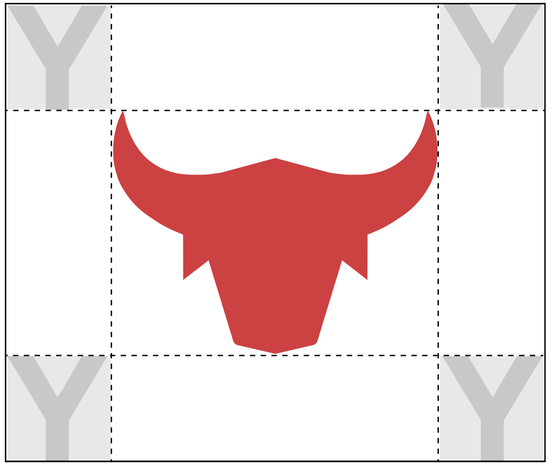
Our yak logo symbolizes the spirit of 'yak shaving' — tackling the small, tedious tasks that stand between you and real progress. The yak represents our mission: to make creating tasks and reporting bugs easy, so developers can stay focused on what really matters.

YakShaver Logo - Icon Only



Logo - Clear Spacing

Maintain at least the height of the ‘Y’ in the logo of clear space around our logo to ensure visibility and impact. This area must remain free of text and graphics, preserving consistency and enhancing brand recognition across all applications.



Logo - Incorrect Use

Don’t use visual effects
(e.g. drop shadow)

Don’t alter the proportion

Don’t alter the typeface

Don’t recolor the elements

Don't place the logo on backgrounds that provide insufficient contrast

Don’t alter the relationship between the elements

Logo - Rare Use

In very rare cases, we split the logo to display only half of it, and it is usually placed on one side of the page.

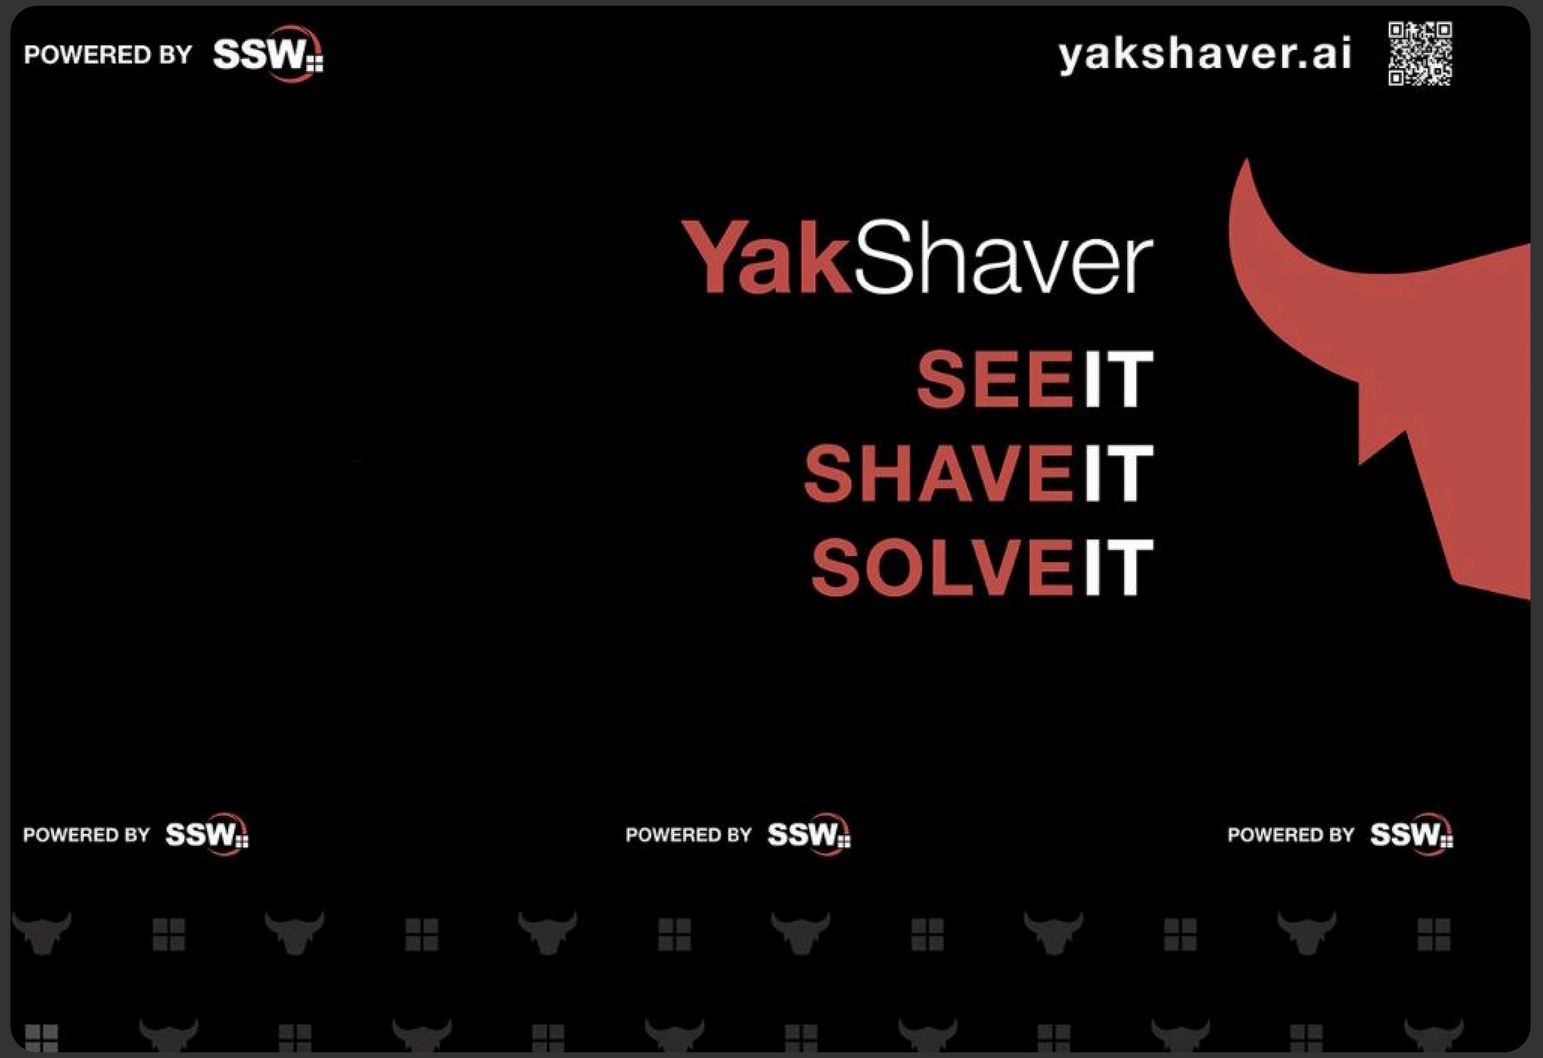
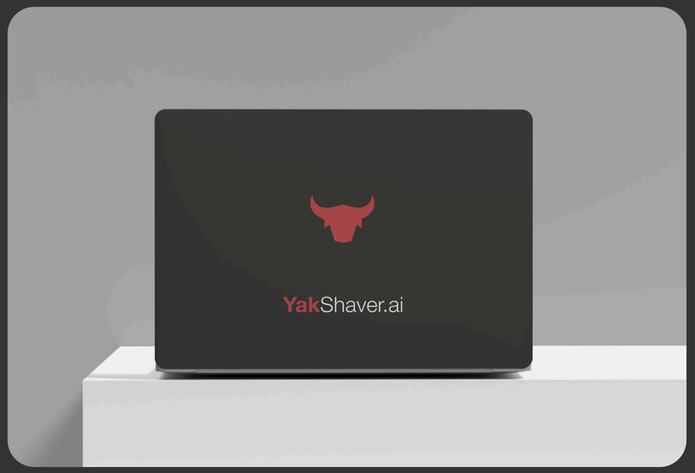
Logo Applications

Logo Applications



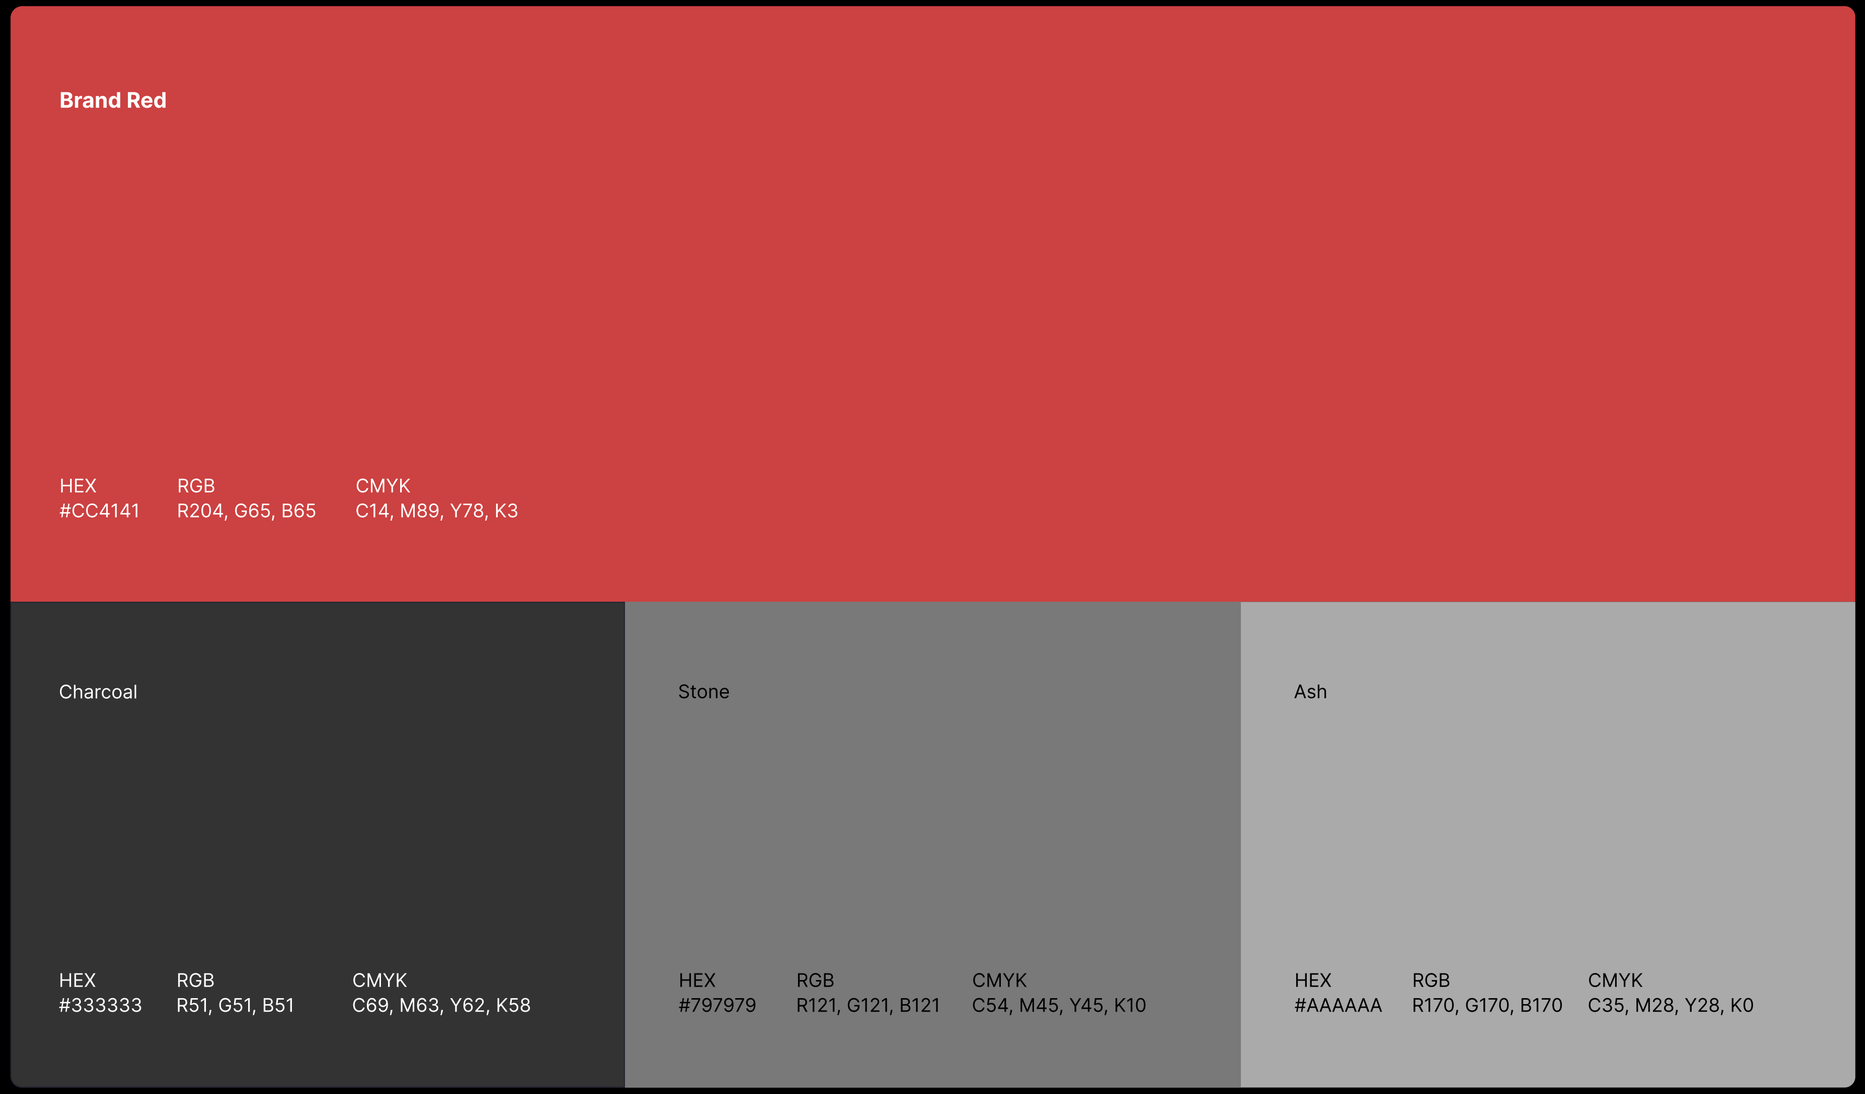
Logo Applications



Color

Primary Palette

Experience our brand’s identity through a carefully curated, evocative color palette.



Color

YakShaver Gradient

Experience our brand’s identity through a carefully curated, evocative color palette.

Start color stop	Intermediate color stop	Intermediate color stop	End color stop
HEX #F6983D	HEX #CC4141	HEX #AF33E4	HEX #4648FF
RGB R246, G152, B61	RGB R204, G65, B65	RGB R175, G51, B228	RGB R70, G72, B255
CMYK C1, M48, Y85, K0	CMYK C14, M89, Y78, K3	CMYK C50, M80, Y0, K0	CMYK C78, M71, Y0, K0

How to use YakShaver gradient as background

To ensure our brand image is effectively integrated without overwhelming the viewer, it should occupy no more than one-third of the screen in any digital or print media. This balance allows for other essential content to be clearly communicated while maintaining our brand's presence.

Typography - Headings

Inter

Our official typeface

The six heading levels used across YakShaver. They render live from the site's base styles, so they always match what you see on the pages. Use exactly one H1 per page, don't skip levels, and don't use heading tags for text that isn't a heading.

Heading hierarchy

Six levels, from the page title to supporting headings.

LEVEL	STYLE PREVIEW	WEIGHT	SIZE (PX)	LINE HEIGHT
H1	The quick brown fox	700	36 / 48	1.1
H2	The quick brown fox	600	24 / 30	1.2
H3	The quick brown fox	600	18 / 20	1.4
H4	The quick brown fox	600	16 / 18	1.5
H5	The quick brown fox	600	16	1.5
H6	The quick brown fox	600	16	1.5

Previews are enlarged proportionally. Use the listed values for the website.

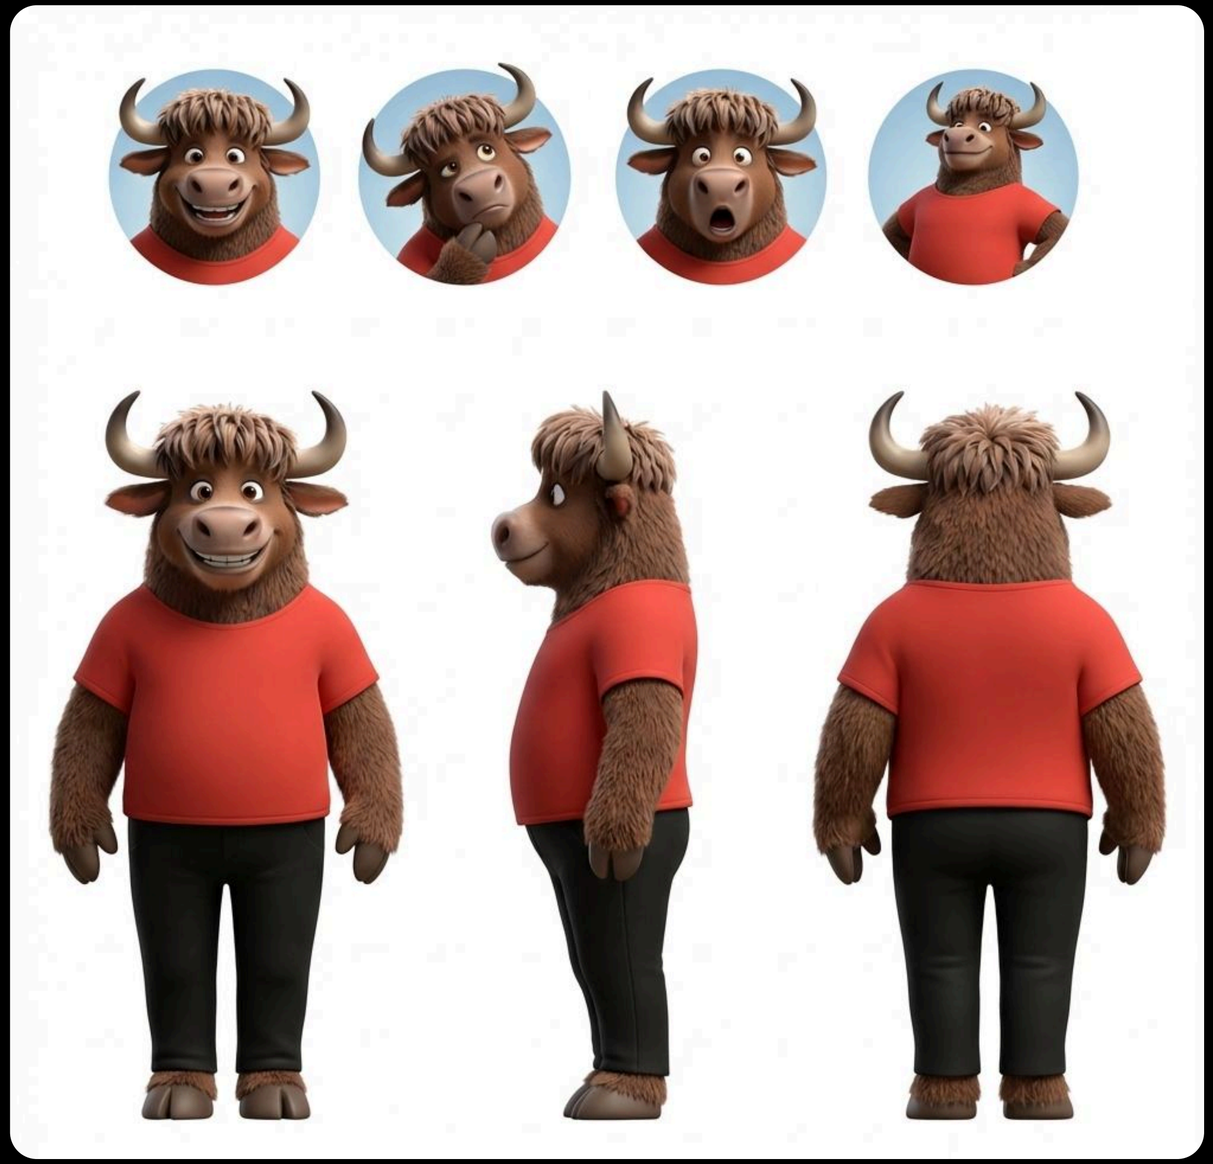
Related SSW Rule: Do you use heading tags where appropriate (H1, H2, H3...)?

Jack the Yak character

The Character

Meet Jack, your friendly neighbourhood productivity partner from YakShaver.ai!

Whether you're tackling a mountain of minor tasks or trying to get to the root of a complex project, Jack provides the steady hand you need to stay focused and keep your workflow smooth. No matter how hairy the project gets, we can trim it down to size together.



How to generate

This character sheet is used as a reference for generating new images and videos of Jack the Yak.
To get consistent results use a prompt like...

> Use the provided character sheet as the exact character reference.
> Do not change colors, facial features, proportions, or style.
> Generate an image of Jack the Yak standing up and covering his eyes with his hooves.

as per the SSW Rule do you generate consistent AI characters across images and videos?
